

ZOOMLION

Truck-mounted Cranes

ZOOMLION truck-mounted cranes cover a lifting capacity range from 4t to 400t. The 4t-22t stiff boom models are used in construction, municipal projects, landscaping, and railway operation, and the 6t-400t knuckle boom models are for confined space, indoor, high-voltage, and telescoping with load operations.

Lead in lifting, control, and safety, with optimized design and rigorous testing ensuring high strength, rigidity, and reliability.

Meet international standards and the certifications like CE, OTTC, and GCC. Support Euro II, III, Euro V, National VI emissions, and "zero-emission" new energy products, ensuring compliance for worldwide sales.

ZLK5200V803

Max. rated lifting capacity

10.04t @ 4.58m

Max. rated lifting moment

450 kN·m

Max. working radius

21.15m

ZLK6200V803

Max. rated lifting capacity

25t @ 2m 17t @ 3m

Max. rated lifting moment

519.4 kN·m

Max. working radius

20.9m

ZLK7600V803

Max. rated lifting capacity

14.14t @ 4.65m

Max. rated lifting moment

650 kN·m

Max. working radius

20.45m

ZLK8200V803-1

Max. rated lifting capacity

15.38t @ 4.61m

Max. rated lifting moment

695 kN·m

Max. working radius

20.6m

ZLK8200V803EV

Max. rated lifting capacity

15.38t @ 4.61m

Max. rated lifting moment

695 kN·m

Max. working radius

20.6m
